

Skills:	Bunny Buster!!	Garden Guardian!	Burrow Beginner	Needs Help
Science Understanding	I clearly explained how animals (like bunnies) survive and interact with their habitat, using real facts and examples.	I described bunny behavior and how it connects to the garden problem.	I mentioned animals or their traits, but it wasn't clear how it helped.	I didn't explain how animals and their traits connect to the problem.
Engineering & Testing	I created a clever, tested solution with clear success rules and explained how it stops bunnies.	I made a design and explained how it works. I tested or improved it.	I made something, but it was missing tests, improvements, or clear goals.	I didn't create a complete design or explain how it helps.
Reading & Speaking	I used books, videos, or diagrams to learn about bunnies or gardens and included important science words (e.g., predator, habitat, adaptation).	I used some facts or words from texts to support my thinking.	I read or looked at resources but didn't use the ideas clearly.	I didn't use any science resources or new vocabulary.
Writing	I wrote a strong piece that clearly explains, argues, or tells a story about bunnies and gardens, with reasons and real facts.	I wrote an explanation or story with some facts or opinions.	I wrote something but left out key ideas or details.	I didn't write much or share my thinking clearly.
Math and Measuring	I used graphs, measurements, or data (like garden space or bunny paths) to support	I included math or data to help my project.	I used a little math but didn't explain it well.	I didn't use any math, data, or measurement tools.

	my solution and explained it.			
Computer Science and Coding	I used a digital tool, sensor, or simple code to help stop bunnies or test my idea and explained how it worked.	I used technology in some way to help share or test my idea.	I used a little technology but not clearly or completely.	I didn't use any digital tools or tech ideas.
Creativity & Design	My project is super clear, creative, and looks great. It shows my bunny-proof idea in a fun and smart way.	My visuals or model help explain my thinking.	My project is a little hard to follow or missing some parts.	My project is messy, confusing, or not finished.
Teamwork	I shared my ideas clearly, worked well with others, and listened to feedback.	I talked about my project and helped my group.	I shared a little but didn't explain or listen much.	I didn't share my ideas or didn't work well with others.
