

Skills:	Planet Protector!!	Earth Explorer!	Eco-Helper	Needs Help
Science Understanding	I clearly explained how my design helps the Earth (land, water, air, or living things) using science facts and maps.	I explained how my design helps nature using a few science ideas.	I gave a basic idea but didn't explain how it helps the Earth.	I didn't explain how my design helps the planet.
Engineering & Testing	I designed a strong solution with clear criteria, tested it, improved it, and explained my choices.	I followed the steps of the design process and made a working solution.	I had a design idea but didn't improve or explain much.	I didn't follow the steps or finish my design.
Reading & Speaking	I used text and pictures to explain science ideas and used important words like natural resources , pollution , or renewable .	I used information from the text and added a few science words.	I read or looked at maps but didn't explain ideas clearly.	I didn't use books, maps, or new words in my project.
Writing	I wrote a great explanation with facts and used digital tools to publish my writing.	I shared facts in writing with some support and details.	I wrote a little but didn't use much detail or facts.	I didn't finish writing or explain my ideas clearly.
Math and Measuring	I measured, graphed, or used data (like area, water use, or energy) to help my design and explained it clearly.	I included some measurements or a graph to support my solution.	I used a little math or data but didn't explain how it helped.	I didn't use any measurement, math, or graphs.
Computer Science	I used technology to	I used a digital tool to	I tried using technology	I didn't use technology

and Coding	research, design, test, or show how my solution works (like a slideshow, map, or simple code).	share or test something.	but didn't finish or explain it.	in my project.
Creativity & Design	My project is eye-catching, organized, and clearly shows my solution or idea.	My visuals are neat and help explain my work.	My project is a little hard to read or understand.	My project is missing visuals or labels.
Teamwork	I worked with others kindly and spoke clearly when sharing my ideas.	I helped my team and shared my ideas out loud.	I worked mostly alone and didn't share much.	I didn't work well with others or didn't present.
